

I enjoy everything XM radio has to offer. The NAB has no business trying to limit XM, because they provide a better product. Stopping technology advancement and great service because you do not like their product is against the American way of life. The NAB has no right trying to take away our first admendment rights. XM provides constant weather and traffic updates, something you cannot get on broadcast radio. Stopping XM radio from providing this service is like turning off cables Weather Channel because it is better and on 24/7, unlike our local TV broadcasters. Kill XM then you have to kill the Weather Channel. Try that and see what happens. Keep XM the way it is. Providing what the American public is willing to pay for!
